SECTION 1

Core Features of the Theme

SECTION 1

Core Features of the Theme

Fonts and Typography

This theme uses:

- **English font:** **Optima** (a humanist sans-serif typeface) for text.
- **Math font:** **ArsenalMath-Sans** (a clean sans-serif math font) via `unicode-math`.
- **Color palette:** harmonious blue, red, and green for structure, alerts, and examples.

- **English font:** **Optima** (a humanist sans-serif typeface) for text.
- **Math font:** **ArsenalMath-Sans** (a clean sans-serif math font) via `unicode-math`.
- **Color palette:** harmonious blue, red, and green for structure, alerts, and examples.

Example math in sans-serif style:

$$\mathbb{E}[X] = \int_{\mathbb{R}} x \, dF(x), \quad \text{Var}(Y) = \mathbb{E}[Y^2] - (\mathbb{E}[Y])^2.$$

Block Environments

Three types of blocks are predefined:

Standard Block

This is a regular block with light blue background.

Standard Block

This is a regular block with light blue background.

Alert Block

Use it to highlight critical points.

Example Block

Suitable for examples or positive remarks.

Custom Box Environments

The package also provides three handy environments with smaller fonts:

Info Box

A compact block, ideal for additional notes.

Custom Math Commands

The theme provides convenient shortcuts:

$$\mathbb{R}, \mathbb{N}, \mathbb{C}, \mathbb{E}, \text{Var}, \text{Cov}, \mathbf{A}, \mathbf{x}.$$

Example: $\mathbf{Ax} = \lambda \mathbf{x}$.

Also available: $\mathbb{P}, ' \text{ (transpose)}, \mathbb{Z}, \mathbb{Q}$, etc.

Also available: $\mathbb{P}, ' \text{ (transpose)}, \mathbb{Z}, \mathbb{Q}$, etc.

This is a speaker's note. Use dual-screen mode to view notes.

Using `allowframebreaks` for Long Content I

This frame demonstrates the `allowframebreaks` option. When a frame has too much content, Beamer automatically splits it across multiple pages. The footline will show the frame number with a continuation suffix (e.g., 1/2, 2/2).

Key Points

- Add `[allowframebreaks]` to the frame options.
- Use `longframe` environment as a shorthand (provided by the theme).
- Ideal for lengthy text, multiple items, or long lists.

Theorem (Continuation Example)

This theorem might be long and split across pages.

Key Points

Speaker's Notes

The default setting is to show the speaker's notes on the second screen. I recommend using Pympress to play it.

Compilation Instructions

To compile this presentation

- Use Lua $\text{\TeX}$ (required for `fontspec` and `unicode-math`).
- Run `Lua $\text{\TeX}$ examplePre.tex` at least **twice** to resolve the table of contents and cross-references.
- For notes, use a PDF viewer with dual-screen support (e.g., `pympress`).
- For long frames, use `[allowframebreaks]` or the `longframe` environment.
